Project no. 01

Project Name:

Recruitment portal

Scope of work:

Client envisions developing a Recruitment Platform to streamline their vendor engagement and the recruitment process for vendors. The following modules should be supported as part of the platform:

- Business User Creation and assign access rights
- New User/Vendor creation and assign access rights
- JD creation and sharing with vendors
- Profile upload and schedule of interviews
- Selection and Onboarding
- Reports

A web application should be developed for data input and management of vendor functions listed at the left. This web application should be hosted on Azure Cloud and offer SSO (Single Sign-On) integration with client's AD (Active Directory). The procurement of infrastructure and software product licences rests with the client.

Project duration:

3 Months

Proposed solution:

Development of web application that supports the following functions

- Business User Creation and assign access rights
- New User/Vendor creation and assign access rights
- JD creation and sharing with vendors
- Profile upload and schedule of interviews
- Selection and Onboarding
- Reports
- Deployment of web application onto Azure cloud infrastructure
- Deployment of SQL database onto Azure cloud
- SSO Integration of the web application with JnJ AD

Technology Stack

The web application will be developed on the following technology stack:

Python 3.7 With Flask(Back-end)
ReactJS 14 or above (Front-end)

Team Details:

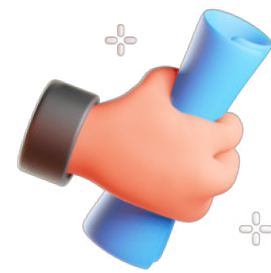

1 UI/UX designer
Visual designer
1 Project Lead
1 Back-end Developer
1 Front-end Developer
2 Full-stack Developer (Full-stack Developer)

Project no. 02

Project Name:

Internal e-commerce Application

Scope of work:

Client envisions developing an e-commerce application where employees can redeem reward points and purchase vouchers.

Project duration:
3 Months

Proposed solution:

Earlier they used to purchase vouchers from other vendors like flipkart and amazon directly. Now with this application they can do their reward program internally with any extra charge. Now employees can chose their reward options

Technology Stack

Python Django
html css
bootstrap template

Team Details:

1 UI/UX designer

1 Project Lead (Full-stack Developer)

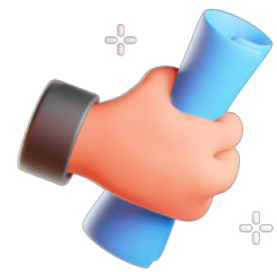

2 Full-stack Developer

Project no. 03

Project Name:

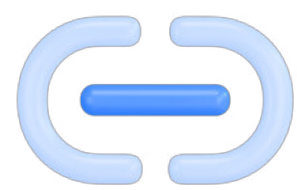

Stock management portal

Scope of work:

To smartly manage stock entities for security personnel

Link of the project:

securi-stonk.herokuapp.com

Project duration:

1 month 15 days

Proposed solution:

The client's office was in multiple locations. So keeping track of people was very hard, along with redistributing resources to places where it was needed the most. Our solution provided an easy way to deploy resources and also reporting. It was an end-to-end project starting from UI to backend.

Technology Stack

Python Django
html css
bootstrap template

Team Details:

1 UI/UX designer

1 Project Lead (Full-stack Developer)

2 Full-stack Developer

About us:

We are a team of 7 people across different technologies and strengths. We are working towards solving problems with cutting edge technologies that help our clients and their business grow manifold.

We are committed to provide the best solution for our clients' needs and grow together. Please contact us for any enquiry you may have. We would be happy to help you out.

Phone number: +91 896124261

Team members:

1 UI/UX designer

Tool: Figma, Notion, Adobe Illustrator
Experience: 2 years

1 Technical Lead (Python)

Tech: Python Flask, Django, Angular, css, html, javascript, CI/CD, Docker, Git
Experience: 7 years

1 Technical Lead (Java)

Tech: Java 1.8, Spring Boot, Hibernate, SQL server, AWS cloud, Angular 6
Experience: 8 years

1 Python Full-stack developer

Tech: Python Flask, Angular, Node JS, css, html, javascript, CI/CD, Docker, Kubernetes, Git
Experience: 5 years 6 years

1 Python Full-stack developer

Tech: Python Flask, Django, ML, NLP, Angular, Node JS, css, html, javascript, CI/CD, Docker, Kubernetes, Git
Experience: 3.5 years

1 Technical Lead (Python + front end)

Tech: Python Flask, Angular, react, Node JS, css, html, javascript, Bootstrap, Git
Experience: 8 years

1 Java developer

Tech: Java 1.8, Spring Boot, Hibernate, SQL server, AWS cloud, Angular 6
Experience: 1 year 6 monts
